Computer Science graduate with hands-on experience in Python, Machine Learning, Computer Vision, and AI-driven application development. Developed intelligent solutions in healthcare and image classification using deep learning techniques and modern development tools. Strong foundation in software development, analytical problem-solving, and translating academic knowledge into practical projects. Seeking opportunities to contribute technical expertise while growing in AI Engineering and Software Development.

Education

Oct 2022 - Jun 2026 ■ **Graduated**
University of Narowal
CGPA 3.13

Technical Skills

- | | |
|-----------------------------|---------------------------------|
| Python | C++/OOP |
| AI ML | Deep Learning |
| Data Preprocessing | Model Training Testing |
| CNN Models | OpenCV |
| Pytorch | TensorFlow |
| Matplotlib Seaborn | NumPy SymPy |
| NLP Fundamentals | HTML5 |
| CSS Tailwind CSS | React.js Next.js |
| UI / UX Design | Git and GitHub |

Soft Skills

- | | |
|---------------------------|---------------------------|
| Microsoft Office | Problem Solving |
| Leadership | Communication |
| Time Management | Punctual |
| Team Collaboration | Project Management |

Projects

- **Bone Abnormalities detection by using medical imaging**
 - Developed deep learning based medical image classification system
 - Implemented EfficientNet + ResNet models
 - Achieved high validation performance**Github Link:**
<https://github.com/noman-9900/Detection-of-Bone-Abnormalities-Using-Medical-Imaging.git>
- **Bank Management**

This Project only command bases project in which just OOP and C++ language implemented

- **Lumina Gallery – Responsive Image Gallery Web Application**
HTML5 | CSS3 | JavaScript
 - Built a responsive image gallery featuring category filtering, real-time search, voice search, interactive lightbox, and dark/light theme.
 - Enhanced user experience with modern UI design, responsive navigation, dynamic image rendering, and contact/FAQ pages.
- **Shoe Factory Network Architecture**
It is Network Architecture based Project which is designed by using Core Switches, Servers, Access Points and all the things which are required for project.
- **Additional practice projects and demonstrations are available on my LinkedIn profile**

Publication

Bone Abnormalities Detection Using Medical Imaging
Spectrum of Engineering Sciences | **Published: June 2026**
DOI: 10.5281/zenodo.21062147
Role: First Author (Muhammad Noman Khan)
Research Area: Artificial Intelligence, Deep Learning, Medical Imaging, Computer Vision, Explainable AI (XAI).

Certification

Jun 2026

- **AI Fundamentals**
Offered by Google from Coursera

Jun 2026

- **AI for Writing and Communication**
Offered by Google from Coursera

Interests

- Problem-Solving & Algorithm Design
- Surfing through Internet
- Machine Learning {AI}

Activities

- Learning and updating Computer science topics
